Subject: Short-term air screening value

All,

We had our MCHM air screening value call from 2:30-3:00.

EPA conducted a route-to-route extrapolation using same NOAEL/LOAEL study CDC/ATSDR used for 1 ppm water CV. They wanted an official request from R3 and they'll prepare a white paper outlining their process. It should take about 2 weeks to develop the white paper. They want NIEHS and CDC/ATSDR to review as well.

Ex. 5 - Deliberative

They want to discuss the anticipated questions and risk communication issues.

Karl
